

BRITISH AIRPORT AUTHORITY:
DEVELOPMENT STUDY FOR TORONTO PEARSON INTERNATIONAL AIRPORT

Services Provided: Market analysis and economic development potential assessment.

Description of Project: TEMS analyzed groundside access facilities for Terminals 1 and 2 as part of a development planning study carried out by the British Airport Authority. The analysis estimated the impact of different groundside access systems on overall airport demand and modal shares. The market analysis showed how improved facilities would impact travel demand and how much joint development would be generated by the project.

Project Start Date

June 1983
